## Risk Factors

*Investing in the PHP FIRST MUTUAL FUND (hereinafter the Fund) involves certain considerations in addition to the risks normally associated with making investments in securities. There can be no assurance that the Fund will achieve its investment objectives. The value of the Fund may go down as well as up and there can be no assurance that on redemption, or otherwise, investors will receive the amount originally invested. Accordingly, the Fund is only suitable for investment by investors who understand the risks involved and who are willing and able to withstand the loss of their investments. In particular, prospective investors should consider the following risks:*

- In General:** There is no assurance that the Fund will meet its investment objective; investors could lose money by investing in the Fund. As with all mutual funds, an investment in the Fund is not insured or guaranteed by the Government of Bangladesh or any other government agency.
- Market Price Risk:** Stock prices and Mutual Fund prices generally fluctuate because of the interplay of the various market forces that may affect a single issuer, industry or the market as a whole. The Fund may lose its value or experience a substantial loss on its investments due to such market volatility.
- NAV Risk:** Stock market trends show that prices of many listed securities move in unpredictable directions, which may affect the value of the Fund's portfolio of listed securities. Depending on its exposure to such securities, the net asset value of units issued under this Fund can go up or down depending on various factors and forces affecting the capital markets. Moreover, there is no guarantee that the market price of the Fund's units will fully reflect the underlying asset value of the Fund.
- Issuer Risk:** In addition to market and price risk, value of an individual security can, in addition, be subject to factors unique or specific to the issuer, including but not limited to management malfeasance, lack of accounting transparency, management performance, management decision to take on financial leverage. Such risk can develop in an unpredictable fashion and can only be partially mitigated, and sometimes not at all, through research or due diligence. To the degree that the Fund is exposed to a security whose value declines due to issuer risk, the Fund's value may be impaired.
- Asset Allocation Risk:** Due to a very thin secondary debt market in Bangladesh, it would be difficult for the Fund Manager to swap between asset classes, if and when required. In addition, limited availability of money market instruments in the market implies that there are only few opportunities for short term or temporary investments for the Fund.
- Lack of Diversification Risk:** Due to small number of listed securities in both the Stock Exchanges, it may be difficult to invest the Fund's assets in a widely diversified portfolio.
- Liquidation Risk:** Market conditions and investment allocation may impact on the ability to sell securities during periods of market volatility. The Fund may not be able to sell securities or instruments at the appropriate price and/or time.
- Dividend Risk:** If the companies wherein the Fund will be invested fail to pay expected dividend, it may affect the overall returns of the Fund.
- Investment Strategy Risk:** The Fund is subject to management strategy risk because it is an actively managed investment portfolio. The AMC will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these techniques and analyses will produce the desired results.
- Socio-Political & Natural Disaster Risk:** Uncertainties resulting from political and social instability may affect the value of the Fund's Assets. In addition, adverse natural climatic condition may hamper the performance of the Fund.

## 2. BACKGROUND

### 2.1. FORMATION OF PHP FIRST MUTUAL FUND:

Over the last decade, the Bangladesh capital market has grown rapidly in size and volume through the efforts of regulators, local exchanges, brokerages, merchant banks and other institutions. Yet the nature and composition of this growth has given rise to some structural problems, such as excessive volatility, speculation based investing, and unusual churn. One of the most effective solutions to these structural issues is by increasing increased participation of mutual funds in our capital markets firstly, mutual funds by virtue of being managed by professionals with the right expertise usually invest on the basis of fundamental research and protect such investments from catastrophic loss through proper risk-management. Thus, mutual funds “invest” rather than “speculate” and can play a vital role in institutionalizing the market and act as a counterweight to excessive market volatility and manipulation. Secondly, mutual funds pool investment capital from thousands of retail investors and institutions that are not market specialists; by doing so mutual funds can bring retail investors’ funds under an institutional umbrella and thereby protecting these small investors from excessive volatility and speculation.

Realizing the vital role that mutual funds can play in improving the capital market efficiency, PHP Power Generation Plant Limited, has come forward and decided to sponsor **PHP First Mutual Fund**. The PHP Group of Industries is one of the largest corporate groups in the country with consolidated annual turnover of more than Tk. 5,000 crores. The Group provides employment for over 10,000 families directly and another 20,000 through its various subsidiaries and holding companies. It should be noted that our Group’s products, such as CI sheet and glass are used by over 5 crore Bangladeshis in every corner of the country. PHP Group is also involved in improving the roads and highways and other infrastructure of the country. As a responsible and ethical corporate citizen, PHP Group of Industries is also one of the highest corporate tax and VAT-payer in Bangladesh.

PHP Power Generation Plant Limited has chosen three trusted partners with successful track record in the Bangladeshi capital market: **RACE Management PCL** as the Fund Manager and the **Bangladesh General Insurance Company (BGIC)** as the Trustee and **Standard Chartered Bank** as the Custodian of the Fund.

### 2.2. FORMATION OF THE PROPOSED MUTUAL FUND IN THE CONTEXT OF PRESENT MARKET SCENARIO:

Since 2006, a number of factors have increased the popularity of stock market investing among Bangladeshi retail investors, including: rising income, low interest rates in traditional bank savings accounts, large stock investment gains, and increased media coverage. This exponential increase in demand is reflected in the 10x growth in average daily trading volume in the stock market during the last 3 years from Tk. 200 crores in 2006-07 to its current Tk. 1,600 crores.

Despite this significant growth in investor participation in the Bangladeshi stock market, and the demand for professionally managed investment vehicles, the domestic mutual fund industry has not responded with adequate supply. With only 26 individual funds to choose and about Tk. 2,900 crores in funds under management, the mutual fund industry has been slow to respond to current capital market realities and comprises only a small percentage of the total stock market investments. To meet this large unsatisfied demand for mutual fund investments in Bangladesh, PHP Power Generation Limited is floating the **PHP FIRST MUTUAL FUND**. In this endeavor, PHP Power Generation Plant Limited has appointed RACE Management PCL to be the Fund Manager; RACE Management has a successful track record in the Bangladesh stock market having achieved the largest private Asset Management Company in terms of funds under management in Bangladesh landmark within a little more than year.

### 2.3. ADVANTAGES IN INVESTING IN PHP FIRST MUTUAL FUND:

Generally investment in mutual funds enjoys some additional advantages compared to investments made directly in other securities of the capital market. Investors of this mutual fund should be able to enjoy the following advantages.

- 1) The Fund will maintain a diversified portfolio which will lower the investment risk for investors.
- 2) The diversified portfolio will allow investors gain a broad exposure to the overall stock market which may not be possible at the individual level.
- 3) This Fund provides access to extensive local research and investment experience. The Fund Manager, RACE Management PCL has developed deep insight into the dynamics of the local capital markets. RACE's research department consistently produces insightful research products on the Bangladeshi stock market which have been highly commended by both local stock market participants and foreign investors.
- 4) As the management of the investments in the Fund is outsourced to a professional Asset Management Company, investors will be relieved from any emotional stress associated with day-to-day management of individual investment portfolio. In fact, investment management usually requires a significant amount of time-consuming research and analyses to identify the highest-quality securities which may not be doable for the general investor and is, therefore, best left to professional investment managers.
- 5) The investors will be able to save in transaction cost as he/she has access to a larger number of securities by purchasing a single unit of PHP FIRST MUTUAL FUND.
- 6) Income will be tax free up to certain level, which is permitted as per Finance Act.
- 7) Investment in the Fund would qualify for investment tax credit under section 44(2) of the Income Tax Ordinance 1984.
- 8) Management and operation of Mutual Funds are subject to strict regulations from Bangladesh Bank, SEC and the Trustee. SEC regularly monitors the performance of such funds. The laws governing mutual funds require exhaustive disclosures to the regulator and general public and, as such mutual funds are one of the most transparent investment vehicles in Bangladesh.
- 9) In Bangladesh, the mutual funds enjoy a 10% (ten percent) reserved quota in all Initial Public Offerings (IPOs). Given the lack of supply of high-quality scripts in the Bangladeshi stock market, IPOs have historically outperformed the general Bangladeshi market index significantly and, therefore, have been a major source of outperformance for the mutual fund industry in Bangladesh.

### 2.4. THE CONSTITUTION OF THE FUND:

## 4. RISK CONSIDERATIONS

### 4.1. RISK FACTORS:

Investing in the PHP First Mutual Fund (hereinafter the Fund) involves certain considerations in addition to the risks normally associated with making investments in securities. There can be no assurance that the Fund will achieve its investment objectives. The value of the Fund may go down as well as up and there can be no assurance that on redemption, or otherwise, investors will receive the amount originally invested. Accordingly, the Fund is only suitable for investment by investors who understand the risks involved and who are willing and able to withstand the loss of their investments. In particular, prospective investors should consider the following risks:

1. **In General:** There is no assurance that the Fund will meet its investment objective; investors could lose money by investing in the Fund. As with all mutual funds, an investment in the Fund is not insured or guaranteed by the Government of Bangladesh or any other government agency.
2. **Market Price Risk:** Stock prices and Mutual Fund prices generally fluctuate because of the interplay of the various market forces that may affect a single issuer, industry or the market as a whole. The Fund may lose its value or experience a substantial loss on its investments due to such market volatility.
3. **NAV Risk:** Stock market trends show that prices of many listed securities move in unpredictable directions, which may affect the value of the Fund's portfolio of listed securities. Depending on its exposure to such securities, the net asset value of units issued under this Fund can go up or down depending on various factors and forces affecting the capital markets. Moreover, there is no guarantee that the market price of the Fund's units will fully reflect the underlying asset value of the Fund.
4. **Issuer Risk:** In addition to market and price risk, value of an individual security can, in addition, be subject to factors unique or specific to the issuer, including but not limited to management malfeasance, lack of accounting transparency, management performance, management decision to take on financial leverage. Such risk can develop in an unpredictable fashion and can only be partially mitigated, and sometimes not at all, through research or due diligence. To the degree that the Fund is exposed to a security whose value declines due to issuer risk, the Fund's value may be impaired.
5. **Asset Allocation Risk:** Due to a very thin secondary debt market in Bangladesh, it would be difficult for the Fund Manager to swap between asset classes, if and when required. In addition, limited availability of money market instruments in the market implies that there are only few opportunities for short term or temporary investments for the Fund.
6. **Lack of Diversification Risk:** Due to small number of listed securities in both the Stock Exchanges, it may be difficult to invest the Fund's assets in a widely diversified portfolio.
7. **Liquidation Risk:** Market conditions and investment allocation may impact on the ability to sell securities during periods of market volatility. The Fund may not be able to sell securities or instruments at the appropriate price and/or time.
8. **Dividend Risk:** If the companies wherein the Fund will be invested fail to pay expected dividend, it may affect the overall returns of the Fund.
9. **Investment Strategy Risk:** The Fund is subject to management strategy risk because it is an actively managed investment portfolio. The AMC will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these techniques and analyses will produce the desired results.
10. **Socio-Political & Natural Disaster Risk:** Uncertainties resulting from political and social instability may affect the value of the Fund's Assets. In addition, adverse natural climatic condition may hamper the performance of the Fund.

#### 4.2. EXPECTED MARKET PERFORMANCE OF THE FUND:

- 1) As the overall stock market index is comparatively low now, the Fund should be able to construct portfolio at a relatively cheaper cost base.
- 2) It is expected that demand for the PHP FIRST MUTUAL FUND units will always rule over supply.
- 3) Brand name of the PHP Group and Trustee, RACE Management PCL's track record in the successful managing of several mutual funds in the past may motivate investors to invest in this Fund.
- 4) World class investment management team of the RACE Management PCL as a second-generation Asset Management Company (AMC) would attract investors to invest in this Fund.

#### 4.3. WHO SHOULD INVEST AND HOW MUCH TO INVEST:

- 1) Individuals who do not have tolerance of bearing risk and know nothing about the functioning of the capital market need not apply for the units of the Fund.
- 2) Individuals who are looking for long-term capital growth and consistent dividend payment and are comfortable with the risks associated with equity investments should consider investing in the Fund.
- 3) An individual should also consider investing in the Fund if he/she can accept some variability of returns, have a moderate tolerance for risk and are planning to invest in the Fund over the medium to long-term.
- 4) Considering other factors like the investment opportunities available in the market, return expectation, income level and consumption pattern, one may put only a portion of his/her total portfolio into the Fund.

Increasing the PHP presence in the Capital Markets is a long-term goal of the Group. The philosophy of the PHP Group is to share the wealth and prosperity generated by its various holding companies with the common masses. There are several ways we are approaching this objective:

- **Sponsorship of the PHP First Mutual Fund:** we believe that Bangladesh capital market needs to become more institutionalized. We are convinced that to protect the small retail investor from speculative losses, more Mutual Funds are needed. PHP Group wants to take a leadership role in such a noble effort.
- **Listing of every industrial unit that meets the regulatory requirements for IPO:** It is the Group's intention to bring each of its 21 units to the capital markets through the IPO process over time. The Investment Committee reviews the Fund portfolio selection process to ensure compliance with the objectives set out in the Trust Deed. In addition, the RACE Investment Committee pays special regard to the SEC guidelines regarding restriction on investments/investment limits as prescribed from time to time; these restrictions relate to single company/group investments, investments in associate companies, investments in unrated debt instruments etc. In addition, the RACE Investment Committee also reviews the portfolio periodically to assess liquidity positions and evaluate the risk parameters and will, from time to time, rebalance the portfolio.

#### **RACE Approach to Fund Management: Highly Process-Driven Investment Approach**

A flexible yet disciplined investment process is the hallmark of a professional investment management fund. Incorporating the intellectual capital and collective experience of the RACE's senior investment professionals, RACE has developed a 7-step investment process:

**Step 1: Universe Selection.** The first step of the investment process begins with identifying the universe of stocks. These stocks are then classified in four categories based on RACE's proprietary selection methodology.

**Step 2: Focus List.** The universe of stock is then narrowed down to build a prospective focus list. This step is usually done in phases. The first phase involves narrowing down the list through RACE's proprietary filtering process. The second phase involves narrowing the list further through the fundamental research inputs.

**Step 3: "Top Down" Analysis** involves analysis of macroeconomic trends, analysis on broad market indices, analysis of fund flow trend to formulate sector biases and sector allocations.

**Step 4: "Bottoms Up" Company Analysis.** This step involves a combination of individual security analysis based on multiple parameters, including valuation, qualitative analysis to identify business trends, competitive outlook and corporate management. These analyses are supplemented by company visits and information exchange with management.

**Step 5: Portfolio Construction.** The next step is to create an optimum portfolio with the goal of maximizing returns and minimizing risk.

**Step 6: Risk Management.** This step applies the pre-determined position limits to the portfolio, limiting sector exposure and individual stock exposure. Maintaining lower volatility is also an important concern; to this end, beta adjustment and other sophisticated risk analysis is used.

**Step 7: Trade Execution:** RACE uses a combination of quantitative strategies and market information to maximize its trade executions. To this end, RACE has selected a panel of brokers to execute its trades in an efficient and confidential manner.

#### **5.5. AUDITORS:**

The Trustee has appointed S F Ahmed & Co. Chartered Accountants as the Auditor of the Fund for the first year. It is one of the reputed and oldest audit firms of the country and is associated with world-renowned Ernst & Young, based in New York.
